

Canine Joint Plus^{HA} is the ultimate joint supplement containing a powerful combination of the finest quality ingredients at exceptional levels. Developed to provide everything your dog's joints need in a single supplement, it provides fast, effective and long term support for joint health.

GLUCOSAMINE:

Provides the major building blocks for joint structure, giving cartilage strength and resilience.

CHONDROITIN:

Aids the repair and formation of connective tissue, slowing the breakdown of cartilage.

MSM:

A bio available sulphur essential for the health and elasticity of tendons, ligaments, muscles, and soft tissue surrounding the joint capsule.

HYALURONIC ACID (HA):

A major part of synovial fluid. Helps to lubricate and cushion the joint.
